RESEARCH INTERESTS

My research studies the quality of human conversation — and the points where it breaks down — through speech. I model dialogue from two directions at once: **what** is said, through language and LLM-based analysis, and **how** it is said, through prosody and timing. Each direction captures what the other misses, and reading them together surfaces what neither shows alone: depth and responsiveness in facilitated group dialogue, early traces of cognitive and affective decline in how a person talks, and the shifts in trust and memory that follow when a voice turns out to be synthetic. Working across **Speech and Language Processing**, **Human-AI Interaction**, and **Computational Communication**, I build interpretable models to understand how people communicate, connect, and respond through speech.

EDUCATION

Ewha Womans University — Seoul, South Korea
M.A. in Communication & Media — *Mar 2025 – Aug 2027 (Expected)*
Advisor: Prof. Jiyoung Kang · GPA: 4.44/4.5

University of Applied Sciences and Arts Northwestern Switzerland — Basel, Switzerland
Exchange Student, Applied Science — *Aug 2023 – Feb 2024*

Ewha Womans University — Seoul, South Korea
B.A. in Communication & Media, Scranton Honors Program — *Mar 2021 – Feb 2025*
GPA: 4.32/4.5 · *Summa Cum Laude*

RESEARCH EXPERIENCE

MIT Media Lab — Cambridge, MA, USA
Research Collaborator, Center for Constructive Communication — *May 2026 – Present*

- Leading the audio analysis of a project on conversational depth in facilitated community dialogue, examining how prosody and timing complement text-based measures of interaction
- Developing a speech processing pipeline using MFA, WhisperX, and acoustic feature extraction to quantify interaction dynamics from raw conversational audio
- Operationalizing conversational depth into interpretable acoustic measures by linking communication theory with speech signal analysis

NAVER Cloud — Seongnam, South Korea

AI Research Scientist Intern, HCX Application AI Modeling Team *Nov 2025 – May 2026*

- Developed speech AI and LLM systems, with focus on extracting discourse and conversational features to improve model performance
- Implemented and fine-tuned deep learning models in PyTorch for speech and language processing

Ewha Womans University Seoul, South Korea

Graduate Research Assistant, Division of Communication & Media *Mar 2025 – Present*

- Conducting independent research on AI-mediated communication and computational media analysis
- Collaborating on interdisciplinary research at the intersection of communication studies and AI

TEACHING EXPERIENCE

Ewha Womans University Seoul, South Korea

Teaching Assistant, "Communication and Society" *2025*

HONORS & AWARDS

2025–2026	Excellence Ewha-in Scholarship ($10,000)	Ewha Womans University
2025	*Summa Cum Laude*	Ewha Womans University
2025	Student Travel Grant, NCA 111th Annual Convention	National Communication Association
2024	Departmental Academic Excellence Scholarship	Ewha Womans University
2023	FHNW International Merit Scholarship	FHNW Switzerland
2022	Excellence Award, 5th Investigative Reporting Contest	Korea News Agency Commission
2021–2025	Highest Honors (all semesters)	Ewha Womans University

LEADERSHIP & ACTIVITIES

ALSA (Asian Law Students' Association)

Local Chapter President, Ewha Womans University *2022 – 2023*

- Organized a special seminar on AI and technology law reform
- Coordinated cross-national collaboration among Asian chapters
- Led chapter recognized as Best Chapter during tenure

YJS Journalism School

Student Reporter *2022 – 2023*

Scranton College Student Council, Ewha Womans University

PR Team Member *2022*

VOLUNTEERING

Korea Association for Ethical Organ Transplants

Translator *2022 – 2024*

HOBBIES

Music (Vocalist, Bassist, Producer) · Skiing (Korea Ski Instructor Level 1)

TECHNICAL SKILLS

Programming: Python, R, JavaScript, LaTeX
Machine Learning: PyTorch, Deep Learning, NLP, Computer Vision, LLM Fine-tuning, Speech Processing
Research Tools: SPSS, PsychoPy, EEG, Unreal Engine (VR)
Other: Ableton Live, Melodyne, Logic Pro, Adobe Photoshop, Microsoft Office

LANGUAGES

English (Native/Bilingual) · Korean (Native/Bilingual) · Japanese (Elementary)
