RESEARCH INTERESTS

My research seeks to understand human communication and interaction through speech. I study spoken interaction from two complementary directions: **what** is said, through language and LLM-based analysis, and **how** it is said, through prosody and timing. By integrating linguistic and acoustic signals, I develop interpretable computational models of spoken interaction, from depth and responsiveness in facilitated group dialogue to early traces of cognitive and affective decline in how a person talks; through behavioral experiments, I also examine how trust and memory shift when a voice turns out to be synthetic. Working across **Speech and Language Processing**, **Human-AI Interaction**, and **Computational Communication**, I aim to uncover how speech reflects and shapes the ways people understand and relate to one another.

EDUCATION

Ewha Womans University Seoul, South Korea

M.A. in Communication & Media *Mar 2025 – Aug 2027 (Expected)*

Advisor: Prof. Jiyoung Kang · GPA: 4.42/4.5

University of Applied Sciences and Arts Northwestern Switzerland Basel, Switzerland

Exchange Student, Applied Science *Aug 2023 – Feb 2024*

Ewha Womans University Seoul, South Korea

B.A. in Communication & Media, Scranton Honors Program *Mar 2021 – Feb 2025*

GPA: 4.32/4.5 · *Summa Cum Laude*

RESEARCH EXPERIENCE

MIT Media Lab Cambridge, MA, USA (Remote)

Research Collaborator, Center for Constructive Communication *May 2026 – Present*

- Developed a seven-construct framework of conversational depth grounded in interpersonal communication theory, extending speaker-centered measures to listener responses and multi-turn dynamics
- Leading prosodic analysis of 215 facilitated group conversations, linking acoustic features to LLM-derived depth measures with mixed-effects models
- Developing a LoRA-tuned Whisper pipeline that preserves disfluencies for timing analysis

NAVER Cloud Seongnam, South Korea

AI Research Scientist Intern, AI Modeling – Speech Team *Nov 2025 – May 2026*

- Developed a multimodal speech–language fusion framework for early detection of cognitive decline, achieving 90.14% F1 on ADReSSo (prior best: 87.32%) [CLOVA Tech Blog]
- Co-developed a LoRA-tuned LLM classifier integrating four speech-derived views (pauses, fluency, discourse topics, phonemes)

Research Collaborator, AI Modeling – Speech Team *Jun 2026 – Present*

- Extending speech–language modeling to depression detection from clinical interviews
- Developing LLM-based persona augmentation to address clinical data scarcity

Ewha Womans University Seoul, South Korea

Graduate Research Assistant, Division of Communication & Media *Sep 2024 – Present*

- Conducting independent research on how people perceive and remember AI-generated speech [8], [5], and collaborating on studies of human–AI interaction and computational media analysis [4], [3]

Graduate Research Assistant, SSK Research Team *Sep 2026 – Present*

- Content analysis of children's YouTube media for an NRF-funded project

TEACHING EXPERIENCE

Ewha Womans University · *Teaching Assistant, "Communication and Society"* *2025*

HONORS & AWARDS

2026–2027	SSK Graduate Assistantship (approx. US$6,700/yr)	Ewha Womans University
2026	SSK Travel Support, INTERSPEECH (approx. US$750)	Ewha Womans University
2025–2027	Excellence Ewha-in Scholarship ($10,000)	Ewha Womans University
2025	*Summa Cum Laude*	Ewha Womans University
2025	Student Travel Grant, NCA 111th Annual Convention	National Communication Association
2024	Departmental Academic Excellence Scholarship	Ewha Womans University
2023	FHNW International Merit Scholarship	FHNW Switzerland
2022	Excellence Award, 5th Investigative Reporting Contest	Korea News Agency Commission
2021–2025	Highest Honors (all semesters)	Ewha Womans University

LEADERSHIP, ACTIVITIES & VOLUNTEERING

ALSA (Asian Law Students' Association) · *President, Ewha Chapter* *2022 – 2023*

- Led chapter to Best Chapter recognition; organized a seminar on AI and technology law reform

YJS Journalism School · *Student Reporter* *2022 – 2024*

Scranton College Student Council, Ewha Womans University · *PR Team Member* *2022*

Korea Association for Ethical Organ Transplants · *Volunteer Translator* *2022 – 2024*

TECHNICAL SKILLS

Programming & Development: Python, R, JavaScript, LaTeX, Docker
Machine Learning & NLP: PyTorch, Hugging Face Transformers, scikit-learn, LLM Fine-tuning (LoRA), Retrieval-Augmented Generation (RAG), Computer Vision
Speech & Audio: Automatic Speech Recognition (Whisper), Speech Emotion Recognition, Prosodic Analysis (Praat), Audio LLMs
Research Methods & Tools: Mixed-effects Models, Experimental & Survey Design, Content Analysis, PsychoPy, SPSS, MNE-Python (EEG)
Creative & Multimedia Tools: Ableton Live, Melodyne, Logic Pro, Unreal Engine (VR), Adobe Premiere Pro, Adobe Photoshop

LANGUAGES & INTERESTS

Languages: English (Native/Bilingual) · Korean (Native/Bilingual) · Japanese (Elementary)
Interests: Music (Vocalist, Bassist, Producer) · Skiing (Korea Ski Instructor Level 1)
